

martec[®]
interconnection solutions

A Career with Martec Ltd.

Martec is a dynamic and growing independent company specialising in the design and manufacture of performance engineered hermetic interconnection solutions for critical, specialist applications that operate in harsh demanding environments. The company has an enviable reputation as a provider of standard products and bespoke solutions to a wide range of customers from varied industrial sectors, including medical, military, oil exploration and aerospace.

Martec was founded in 1987 and its success to date is now being hallmarked by truly impressive growth rates. Future growth will be contingent on building the management team and acquiring new talent. Martec currently has three vacancies that will be key to fulfilling its growth and profit potential and invites applications from candidates with the necessary qualities to maximize these opportunities. All vacancies are based in Whitstable, Kent.

Development Engineer

Experienced applicants or recent graduates in Engineering or materials science. The appointee will work within the Engineering Team to drive successful developments and progress in new products and processes from concept through to customer acceptance, including management and update of design models and 3D solid modeling. Knowledge of materials science essential.

To project manage product development activities in a thorough and effective manner to ensure;

- On time delivery
- Projects are managed to budget
- To develop and maintain good working relationships with customers and suppliers

Operations Engineer

Suitable for recent graduate or candidates with experience in Mechanical/Manufacturing Engineering or Materials Science. Computer literate in ERP systems and advanced spreadsheets/databases would be beneficial, as would a knowledge of lean manufacturing and/or Sigma 6.

This critical role includes planning processes, equipment, people and factory space requirements, project management with regard to capital equipment installation and process verification and production planning using lean manufacturing.
